Re: Petition of the Pennsylvania Public Utility Commission for Waiver of the  
Mandatory 10-Digit Dialing Requirement in the 412 Area Code  
Docket No. 96-98

Dear Mr. Caton:

Enclosed please find additional information regarding the number shortage in the 412 area code. On March 4, 1997, the Pennsylvania Public Utility Commission ("Pennsylvania Commission" or "PaPUC") received a letter from Numbering Administrator Wayne Milby which informed the Pennsylvania Commission that 43 NXX codes remained available, including those that would be assigned in March. Presently, seven codes are being assigned each month under existing jeopardy procedures which means that the likely exhaust date will be August, 1997. At the 412 NPA Jeopardy Industry meeting held yesterday, the industry agreed to reduce assignment of NXX codes at a rate of two per month, rather than seven, starting in May if the FCC has denied or not yet decided the Pennsylvania Commission's Waiver Request. While the reduced code allocation would extend the existing jeopardy situation by ten additional months, it would cover the contingency situation that would arise if the Pennsylvania Commission decided, based upon the FCC decision, to implement a split.

Based upon information available to the Pennsylvania Commission at this time, affected carriers have done preparatory work to implement an overlay on May 1, 1997, and are currently awaiting the FCC decision on the Pennsylvania Commission's Waiver Request.<sup>1</sup>

<sup>1</sup>In the proceeding now pending before the Pennsylvania Commonwealth Court brought by Allegheny County and MCI Telecommunications Corporation against the Pennsylvania Commission, the Pennsylvania Commission has asked the Court to defer

Mr. William F. Caton  
March 31, 1997  
Page 2

With regard to the timing involved with implementation of either a split or an overlay, the Pennsylvania Commission has obtained the following information from Bell Atlantic. Bell Atlantic estimates that ILEC network preparation for a split in the 412 area code will take approximately seven months. During this same time period, customer educational efforts are also undertaken. Added to this is an additional six months for a permissive dialing period. The permissive dialing period is for the benefit of business customers largely, giving them the opportunity to change their existing equipment to adapt to the new area code. Finally, an intercept period of three months is then instituted to route misdialed calls to a recorded announcement. Thus, altogether, the minimum amount of time according to Bell Atlantic to implement a split in the 412 area code would be approximately fifteen to sixteen months.

As previously stated, with regard to overlay implementation, the initial network preparation has already been done. Bell Atlantic states that its and other affected ILECs' initial network preparation which has been completed is the same, regardless of whether the overlay is implemented using ten-digit dialing or seven-digit dialing. Most affected carriers would be ready to implement a seven-digit overlay on the scheduled implementation date of May 1, 1997. Bell Atlantic estimates that it will take three months of network preparation for it to implement a mandatory ten-digit dialing requirement. Bell Atlantic also recommends a permissive dialing period of six months beyond the three month network preparation period. This brings the total time to implement an overlay with mandatory ten-digit dialing to nine months. Bell Atlantic states that GTE and North Pittsburgh, the other ILECs in attendance at the 412 NPA Jeopardy Industry meeting, were both in agreement with these timetables. Bell Atlantic also reported that there was no disagreement by other industry members regarding these time frames, apart from suggestions from several carriers, including CLECs, that the customer education period and/or permissive dialing period be shortened if possible.

At your request, I have confirmed with Bell Atlantic that it did not begin its educational efforts until after the Pennsylvania Commission entered its 412 Overlay Order in September, 1996. Bell Atlantic reports that it did not discuss dialing patterns until February, 1997. Bell Atlantic states that the only ad referencing seven-digit dialing appeared in February, 1997 in several newspapers in the 412 area. Additionally, the Company sent out letters to business and residential customers in February, 1997. Bell Atlantic has supplied the Pennsylvania Commission with copies of all of its 412 area code advertisements and letters, which are attached for the

---

its ruling until the FCC acts on the Pennsylvania Commission's Request for Reconsideration of the Second Report and Order or its pending Petition for Expedited Waiver of the Mandatory Ten-Digit Dialing Requirement ("Waiver Request").

Mr. William F. Caton  
March 31, 1997  
Page 3

FCC's information and review. Bell Atlantic has assured the Pennsylvania Commission that no further ads will be placed or letters sent to customers referencing dialing patterns until the FCC rules on the Pennsylvania Commission's Request for Reconsideration or its Petition for Expedited Waiver of the Mandatory Ten-Digit Dialing Requirement. Further, the PaPUC is not aware of any other letters or advertisements by other affected ILECs which discussed dialing patterns.

Finally, I would like to clarify two points which the Pennsylvania Commission made in its late-filed Reply Comments. On page 5, we referred to the large number of NXXs available to CLECs at the present time, given existing allocations; the fact that only two facilities-based CLECs had even requested NXXs; and anticipated NXX assignments in the future. We continue to believe that current supplies for local resellers will be sufficient until permanent number portability becomes available in mid-1998; and that there will be no competitive disadvantage to local service resellers. While we recognize that NXXs for facilities-based providers are in short supply at the present time, the Pennsylvania Commission continues to believe that the concern arising from the rate center restriction is overstated since it is likely that most new CLEC customers will be existing customers of the ILEC, and that interim number portability, and later permanent number portability, will permit the customer to retain seven-digit dialing in rate centers in which the facilities-based CLEC has no assigned NXXs. I have attached a copy of the NXX Code Utilization Summary mentioned at page 12 of the Pennsylvania Commission's Reply Comments.

Second, while we are aware of the suggestions of at least one or two parties before the FCC that ILECs may be improperly warehousing NXX codes to the disadvantage of their competitors, it is our understanding that there are code assignment restrictions on this sort of activity and that these numbers will also be used to satisfy the demands of CLEC resellers, ameliorating any competitive advantage which would otherwise inure to the ILEC. We reiterate that there was no credible evidence presented to the Pennsylvania Commission to indicate that any ILEC was engaging in improper warehousing activities to the disadvantage of its competitors.

The Pennsylvania Commission has gone to great strides to ensure that its policies will promote effective and meaningful competition in local markets in the Commonwealth. However, in its 412 Overlay Order, the Pennsylvania Commission found that the permanent inconvenience to customers outweighed the temporary competitive concerns expressed by some CLECs, given the availability of interim number portability, and permanent number portability in the near future.

Mr. William F. Caton  
March 31, 1997  
Page 4

Finally, the Pennsylvania Commission assures the FCC that once the FCC rules on its Petition for Expedited Waiver or Petition for Reconsideration, the Pennsylvania Commission will act expeditiously to reconsider its Order as necessary and take appropriate action giving recognition to the FCC's findings.

If you have any further questions regarding this matter, or would like additional information, please do not hesitate to contact me.

Very truly yours,

Maureen A. Scott  
Assistant Counsel

**RE: 412/724 Education Materials**

I have been asked to supply all of the information that has been sent or published regarding the new western Pennsylvania area code. Each piece has been numbered and is identified as follows:

**Phase I**

<b>Item</b>	<b>Execution Date</b>	<b>Target Audience</b>
#1. - Bill insert	September 96	All 412 customers
#2. - Ad	November 96	Various newspapers in the 412 area
#2a. - Ad (small print)		
#3. - Customer letter	November 96	All 412 business customers
#3a. - Brochure	November 96	enclosed with the 412 business letter

These materials were sent as Part I of our two-phased education plan. There were no dialing instructions in any of these documents.

**Phase II**

#4 - Ad	February 97	Various newspapers in the 412 area
#4a. - Ad (small print)		
#5. - Customer Letter	February 97	All 412 residence customers

These materials were part of our Phase II plan and included dialing instructions.

#1 pg 1

Early next year, Pittsburgh and all of the communities that are now part of the 412 area code will get an additional area code. The new area code will be 724.

Pennsylvania, like the rest of the nation, is experiencing tremendous demand for telephone numbers. The reasons are simple - many of us have come to rely on a host of new telecommunications tools and services. Things like cellular telephones, computer modems / access to on-line services, the Internet, facsimile machines and pagers. This demand has created a shortage of seven digit telephone numbers in the 412 area code.

The method that will be used to add the new area code is called an Overlay. This means that 724 will be working within the same geographic area that

412 presently works. Your area code and telephone number(s) *will not change*. The new area code will be assigned to those who request new telephone numbers in the areas where 412 numbers are no longer available.

The addition of a new area code *will not have any effect* on the rates you pay for telephone service. Your local calling area will not change even if that area starts to include telephone numbers that have the new area code. Any local that you make today will remain a local call. Any toll call that you make today will remain a toll call.

This is the first of many notifications you will receive in the months to come. We intend to provide you with all the information you will need about the new area code so that its introduction is a smooth one.

**© Bell Atlantic**

AC-8/96

There's been a lot of talk about the new western Pennsylvania area code. Most taking place via telephones, cell phones, faxes, modems, and the new local service competitors.

Which gives you an idea why we need another area code in the first place.

(724) is coming soon.

There are a great many western Pennsylvanians enjoying the convenience of telephones, cell phones, faxes, beepers, and modems. All this new technology, combined with new local competition, has resulted in a need for more new telephone numbers.

New area codes give us those new numbers. Millions of them. So if you're in

the (412) area code, we'd like to introduce you to another one: (724). We'll be adding it to your area sometime in the not-so-distant future.

The good news is: your rates won't change, nor will your current phone number. And we'll be there to walk you through every little thing that will take remembering to give

out your area code when you give out your phone number).

Just think, now you can use all the phones, beepers, faxes, modems, and gizmos you want.

And, as always, please feel free to call us with any questions, at 1-800-500-2157, Monday through Friday, 9AM-5PM.

For lots more information on this change, please visit our Home Page on the Internet at <http://www.bellatlantic.com>

 Bell Atlantic

Starting May 1, 1997, western Pennsylvania will be getting an additional area code: (724) Here's why:

John Q. Sample  
123 Main Street  
Anytown, USA 12345-6789

Dear John Sample:

Nowadays, people have more choices than ever when it comes to telecommunications. Fax machines, beepers, cellular telephones and computer modems are already in great demand. And more choices will emerge as new companies begin to provide local telephone service. Adding a new area code to the existing (412) region will provide millions of new phone numbers to meet your growing communications needs.

Your area code and phone number will remain the same.

Starting May 1, 1997, customers ordering new numbers and phone lines in the (412) region could be assigned the new (724) area code. Existing phone numbers won't change. So it's important to start asking everyone for their area codes. And to start giving them yours.

Rates won't be affected.

Rates will not be affected by the new (724) area code. And neither will your local calling area. So a local call is still just that—a local call.

**Check your PBX.**

You should check to make sure your PBX System can handle the new (724) area code. Call your PBX vendor for more details. And tell your customers to check with their equipment suppliers—you'll want to make sure they can reach you, too.

**More to come.**

Bell Atlantic will soon be sending your business more information about the new (724) area code. But for now, just remember to let everyone know about your area code. And remember to leave room for theirs.

If you have questions, call us toll free at 1 800 500-2167, Monday through Friday, 9AM–5PM.  
We're here to help.

Sincerely,

Sandy Scott

Sandy Scott  
Manager, External Affairs

**Starting May 1, 1997, western Pennsylvania will be getting an additional area code: (724). So it's more important than ever that when you take down a phone number, you remember to include the area code. And that you start giving out yours to customers, business associates and friends.**

**Got questions? We've got answers.**

**Q. Why is western Pennsylvania getting an additional area code?**

**A.** Nowadays, people have more choices than ever when it comes to telecommunications. Fax machines, beepers, cellular telephones and computer modems are already in great demand. And more choices will emerge as new companies begin to provide local telephone service. Adding a new area code to the existing (412) region will provide millions of new phone numbers to meet your growing communications needs.

**Q. Will my area code change?**

**A.** Starting May 1, 1997, customers ordering new numbers and phone lines in the (412) region could be assigned the new (724) area code. Existing phone numbers won't change. So it's important to start asking everyone for their area codes. And to start giving them yours.

**Q. Will my rates go up because of the (724) area code?**

**A.** No. Rates will not be affected by the new (724) area code. And neither will your local calling area. So a local call is still just that - a local call.

**Q. Is there anything my business should be doing to prepare for the change?**

**A.** From now on, when you give out your phone number to customers, business associates and friends, be sure to include the area code. And ask them for theirs. So even if you already know that the phone number for your copy service is 555-1234, you should make a note of its complete phone number, (412) 555-1234. That way, when the new (724) numbers go into effect, you'll know exactly who has which area code.

**Q. What about our PBX System?**

**A.** PBX Systems should be checked to make sure they can handle the new (724) area code. Call your PBX vendor for more details. And tell your customers to check with their equipment suppliers - you'll want to make sure they can reach you, too.

**Q. What next?**

**A.** Soon, you'll be receiving some additional information about the new (724) area code. Until then, just remember it's coming. And remember to leave room for it.

*If you have any questions, call us toll free at 1 800 500-2167, Monday through Friday, 9AM - 5PM. We're here to help.*

( We managed to squeeze  
millions of numbers in here. )

### Area code (724) is coming to western Pennsylvania.

Nowadays, a great many western Pennsylvanians enjoy the conveniences of telephones, cell phones, fax machines, pagers, and modems. All this technology, combined with new local competition, has resulted in a need for more new telephone numbers. Just by taking another area code, we can give those millions of new phone numbers which are needed.

So if you're in the (412) region, we'd like to take this

opportunity to introduce you to the new (724) area code, officially starting May 1st. But don't worry; it does not mean your phone number is changing. Only some of the new numbers that will be added after May 1st will get the new (724) code.

And your rates will not change either. A local call is still a local call, even if you're calling a new neighbor or new business having the (724) code. In addition, you'll

only have to dial an area code when it's different than the one you're calling from. But to make the transition easier, it would be great to start predicting going and getting area codes whenever you exchange numbers.

As always, please feel free to call with any questions you might have, at 1-800-300-2167. Our toll-free lines are open Monday through Friday from 9-5. We will be happy to help you in any way we can.

For more information, please visit our Home Page on the Internet at <http://www.BellAtlantic.com>

**Bell Atlantic**  
THE HEART OF COMMUNICATION®

2/1/97

Starting May 1, 1997,  
western Pennsylvania will be  
getting an additional area  
code: **(724)** Here's why:

John Q. Sample  
123 Main Street  
Anytown, US 12345

Dear John Sample:

Nowadays, people have more choices than ever when it comes to telecommunications. Fax machines, beepers, cellular telephones and computer modems are already in great demand. And more choices will emerge as new companies begin to provide local telephone service. Adding a new area code to the existing (412) region will provide millions of new phone numbers to meet your growing communications needs.

**Your area code and phone number will remain the same.**

Starting May 1, 1997, customers ordering new numbers and phone lines in the (412) region could be assigned the new (724) area code (if no more (412) numbers are available in their area). Existing phone numbers won't change. So anyone you know that has the (412) area code will continue to have the (412) area code. But you should get into the habit of asking everyone for their area code today.

**Dialing couldn't be easier.**

If you're calling someone who has the new (724) area code, just dial it as you would when calling any other area code: 1 + (724) + 7-digit number. And if you're calling someone with the (412) area code, nothing changes. Just continue to dial the same 7-digit number.

**Rates won't be affected.**

Rates will not be affected by the new (724) area code. And neither will your local calling area. So even if people in your local calling area start getting the new (724) area code, calls to these numbers will still be local calls.

**More to come.**

As May 1st approaches, you'll be seeing a lot more about the new (724) area code. But, if you have any questions in the meantime, call us toll free at **1 800 500-2167**, Monday-Friday, 9AM-5PM. We're here to help.

Sincerely,

*Sandy Scott*
